RE: Nearly 60 Fax Sheet Petitions Coming Your Way On Yucca Mountain  
Opposition

Dear Ms. Dixon:

With this letter please be advised that this is the beginning and majority of the faxes I will be sending you during the commentary period. At the Chicago DOE hearing, I mentioned this issue to the moderator so that fact is on the record.

We appreciate the extension of the commentary period. Thank you.

Respectfully,

P. St. John

**PLEASE ACKNOWLEDGE

## Protect Western Shoshone Indian Land at Yucca Mountain, Nevada from a High-Level Nuclear Waste Dump!

1

Since high-level nuclear waste dumps are under the Environmental Protection Agency, which is mandated to protect public health and the environment, not to cave in to pressures from the nuclear establishment, we the undersigned demand:

- The Safe Drinking Water Act must be upheld, for the worst doses to communities living downstream will come from use of contaminated groundwater.
- Radioactivity is deadly for hundreds of thousands of years. EPA must protect future generations through the period of peak doses, up to 300,000 years into the future.
- EPA proposes a 20 kilometer (12 mile) nuclear sacrifice zone. Dilution is not the solution to pollution. This is unacceptable. Compliance should be met on-site, or at the site boundary.
- EPA should protect the most vulnerable persons: subsistence farmers, especially pregnant women, the unborn within their wombs, children, the infirm, and the elderly.

2

An unsuitable site should not be used for high-level nuclear waste disposal. If Yucca Mountain cannot meet the standards, it must be disqualified.
